Parklawn Health Library System's Journal List

The Journal List is a semi-annual publication produced in October and April which contains approximately 1,500 serial titles held by the Parklawn Health Library (PHL) System. It includes journals, newsletters and electronic databases found at PHL and its two branches: the NCHS Staff Research Library and the AHRQ Information Resources Center. The Journal List is composed of two sections: 1) an alphabetic list and 2) a subject list. Arranged in alphabetical order by each word in the title, the alphabetic list includes the frequency, volumes, and years for each title. The subject list is an arrangement of titles by subject categories. Both sections include locator symbols that indicate which library subscribes to the title. The locator symbols are:

IRC - AHRQ Information Resources Center
PHL - Parklawn Health Library
SRL - NCHS Staff Research Library

To locate a title both in this list and on the shelves, please be aware of the following guidelines: 1) if a journal title has changed, it can also be found under its previous title in the alphabetical list, 2) any journal whose title bears the name of a professional association can be found under the associations's name, e.g. the Journal of the American Medical Association (JAMA) is filed under American Medical Association Journal, and 3) initialisms and acronyms are filed at the beginning of each alphabetic letter. In addition, an * denotes newsletters which are shelved separately from the journal collection.

The complete Journal List is available in paper copy or the alphabetical section is available via the library's web site at <http://library.psc.gov> under Publications.

BIOTERRORISM AND INFORMATICS

Bioterrorism is defined as the intentional use of infectious biological agents to cause illness and spread fear or intimidation. Informatics deals with the management of information and knowledge by computers. AHRQ has recently funded research that clearly shows how informatics would aid the demand for the collection and distribution of needed health information if bioterrorism occurs.

CHILDHOOD ASTHMA

Asthma, the most common serious chronic disease of childhood, affects nearly 5 million children in the U.S. causing almost 3 million physician visits and 200,000 hospitalizations each year. Characterized by

coughing, chest tightness, shortness of breath and wheezing, childhood asthma is often triggered by exercise, infections, allergies, and weather. NCHS has published data on childhood asthma in 4 of its surveys; the National Health Interview Survey, the National Ambulatory Medical Care Survey, the National Hospital Discharge Survey, and the National Hospital Ambulatory Medical Care Survey.

CHILDREN'S MENTAL HEALTH

It is estimated that 20% of the children in the U.S., or 13.7 million children, have a diagnosable mental illness. Of these, only one-fifth receive mental health care. Factors contributing to this unmet need for child mental health care include the lack of a primary mental health care system for children, culturally irrelevant services, the lack of adequate health insurance, stigma, and the shortage of available mental health providers. To help alleviate this problem, SAMHSA's Comprehensive Community Mental

Health Services for Children and their Families Program provides grants to states, communities, territories, and Native American tribes in order to improve and expand their mental health systems of care for children and their families.

HEALTH PROFESSIONS PROGRAMS

Programs in HRSA's Bureau of Health Professions (BHP) help to assure consumer access to health professionals who deliver quality care in all geographic areas and to all segments of society. To ensure the success of its programs, BHP monitors workforce trends, collects information through quality assurance data banks, encourages health professionals to serve the underserved, and promotes cultural and ethnic diversity within the health professions workforce.

SCHOOL VIOLENCE PREVENTION

Youth violence extracts an enormous toll on the nation's resources. Prevention can make a difference in the lives of America's children who must feel safe and be safe in school in order to become competent, resilient adults. SAMHSA's Center for Mental Health Services and NIDA are co-sponsors of the National Prevention Network's November 2002 Conference--The Prevention Frontier: Moving Research and Practice into Every Community. This conference brings together nationally recognized researchers and practitioners who are using research as a guide for prevention programs.

GUIDE TO LIBRARY RESOURCES

LIGHT IN THE HEART OF DARKNESS: EMDR AND THE TREATMENT OF WAR AND TERRORISM SURVIVORS. Silver, Steven M. and Rogers, Susan, W.W. Norton and Co., New York, NY, 2002. WM 170 S587

This book is an authoritative guide to the application of EMDR (Eye Movement Desensitization and Reprocessing) to war and terrorism trauma. The authors provide a comprehensive focus on the application of EMDR to a wide range of clients' traumatic experiences. Included are:

- Overview of EMDR
- Nature of trauma
- Case histories
- Client preparation and assessment
- Overview of methodology
- Blocked response
- Client issues

NEUROBIOLOGY OF VIOLENCE. Volavka, Jan, American Psychiatric Publishing, Washington, DC, 2002. BF 575.A3 V88

This book addresses the origins rather than the consequences of violence. It provides evidence relating to the psychobiological origins of violence as well as the societal causes. In addition, violence, aggression, and hostility are defined and the methods of measuring these behaviors and attitudes are reviewed. Chapters include:

- Neurochemistry of violence
- Congenital and demographic factors
- Developmental antecedents of violent behavior
- Personality disorders and impulse control
- Pharmacological treatment of violence

LIBRARY CLIENTELE

The Parklawn Health Library System serves the following components of the Department of Health and Human Services (HHS):

- Administration for Children and Families
- Administration on Aging
- Agency for Healthcare Research and Quality
- HHS Regional Offices
- Health Resources and Services Administration
- Indian Health Service
- National Center for Health Statistics
- National Institute of Mental Health
- National Institute on Drug Abuse
- Office of the Secretary
- Office of Public Health and Science
- Program Support Center
- Substance Abuse and Mental Health Services Administration

LIBRARY MISSION

The Parklawn Health Library, the NCHS Staff Research Library, and the Information Resources Center plan, develop, and administer a national research collection and innovative information programs in direct support of the Department of Health and Human Services.

LIBRARY COLLECTION

The Scope of the collection includes the delivery of health care, health administration, health policy, health services research, health promotion and disease prevention, computer sciences, management sciences, medical sociology, health statistics, international health, epidemiology, public health, mental health, psychiatry and neurology, and substance abuse.
